Paris, Tuesday, May 26, 2026

**NW IS RESPONDING TO THE NATIONWIDE PUSH FOR THE ELECTRIFICATION OF FRANCE AND HAS ANNOUNCED PLANS TO INVEST €1.2 BILLION IN ENERGY STORAGE BY 2030**

At the invitation of the President of the Republic, Jean-Christophe Kerdelhué, CEO of the NW Group, France's first energy transition unicorn, announced on Tuesday, May 26, during a meeting of "France's Electricity Team" at the Élysée Palace, that the company would invest €1.2 billion by 2030 in energy storage and electric vehicle charging stations.

The NW Group, a leader in stationary storage in France and Finland, already operates 2 GWh of batteries and more than 600 high-power charging stations for electric vehicles. The NW Group's solutions, designed and patented in France, provide the flexibility necessary for grid resilience and support its customers—both individuals and businesses—in the electrification of uses and flexibility.

**Jean-Christophe Kerdelhué, CEO of the NW Group, states :** *“At NW, we want to contribute to this national goal of achieving cheaper, more self-sufficient, and more sustainable electricity: our solutions help position France as one of Europe’s leaders in smart grid infrastructure.”*

---

**NW**

The NW Group develops a range of solutions designed to make the energy transition accessible to everyone. As the leader in France and Finland in battery-based electricity storage with the JBox®, NW is also a major player in high-power electric vehicle charging thanks to its IECharge® technology. The NW Group develops pioneering solutions for energy storage and consumption management, designed for both businesses and individuals, supporting them in the electrification of their energy use. Through its innovative solutions, patented in France and internationally, NW aims to increase the share of carbon-free energy in the electricity mix and make it accessible to consumers, support the stability of the power grid, and contribute to the development of electric mobility in France and globally. NW is France’s first energy transition unicorn and is currently expanding its operations in Finland, Sweden, Italy, Texas (U.S.), and Japan.
